Energy Management Policy (with regard to ISO 50001 Standard)

P&A Transport (Sweepers) Ltd has an established corporate commitment to achieving continuous improvements in energy/utility efficiency which is also linked with our Environmental Policy.

1. POLICY STATEMENT

As part of its overall environmental policy the company fully supports the Welsh Government's stated objective to reduce CO2 emissions and is committed to reducing its' own normalised emissions through improved energy efficiency.

By efficient management of energy, the company aims to minimise:

Energy use, Energy costs, Environmental impact of harmful emissions, Depletion of fossil fuels

Whilst maintaining operational goals and an acceptable working environment for staff and customers.

2. POLICY OBJECTIVES

- To continue to develop and maintain the infrastructure necessary for measuring and reporting our fuel consumption.
- Reduce our fuel consumption by investing in new, more efficient plant and equipment as opportunities arise. This will also lead to reduced emissions as all new plant complies with current emissions standards.
- Purchasing of new electrical equipment and appliances that are as energy efficient as possible ideally carry an AAA rating.
- To increase the energy awareness and a sense of individual responsibility in our staff.

3. PERFORMANCE MONITORING AND REPORTING

- Monitoring of fuel bills provided by senior management.
- Fuel data will be collated and made available to staff.

4. RESPONSIBILITIES

The Director is fully committed to the implementation of this policy. We will work with our employees in order to achieve the policy objectives described. The Director is responsible for ensuring that the policy is periodically reviewed so that it continues to be effective and relevant to the business.

Paul Davies

Director
